

How does Two-Step Work?

When you log in to a page like this:

The screenshot shows the Brown University logo and name at the top. Below it is a form titled "Authentication Required" with the subtitle "Enter your Brown credentials". The form contains two input fields: "Username: *" with the text "jcarberr" and "Password: *". At the bottom of the form are a "Continue" button and a link for "Forgot your password?".

Single Sign On:

Two-step occurs on login screens that look like this, including Workday, Banner, and Canvas (but *not* your email)

This is where you enter your Brown username and password

You'll choose a way to verify:

The screenshot shows a verification selection screen. At the top is a dropdown menu with "iPhone (XXX-XXX-5555)" selected. Below it are three green buttons: "Send me a Push", "Call Me", and "Enter a Passcode". At the bottom is a checkbox labeled "Remember me for 30 days".

Choose a device / phone

Send a push notification (for smartphones and tablets)

Receive a call (any phone - press a key to accept)

Enter a bypass code (codes are in MyAccount or can be texted to you)

"Remember Me" makes it easy!

Check "Remember Me" to avoid another prompt on this browser for 30 days

Set Up Two-Step Verification

1 Smartphone? Install the App

Apple, Android, and Windows smartphones:

- Install the app called **Duo Mobile** in your app store.

No smartphone? No problem! Skip to the next step.

2 Enable Two-Step in MyAccount

- Visit <https://myaccount.brown.edu/twostep/settings>
- Sign in.
- Check the **Enable** box and **Save**.

Leave this page open for the next step.

Two-Step Verification

Two-factor authentication requires one to provide an additional pin in order to gain access to a software application. Use of multi-factor

3 Add Your Device or Phone Number

- Still in MyAccount, click **Add Device**. + Add Device
- Enter details for your phone and **Save**.

Name:	My Personal iPhone	Extension:	
Phone number:	4015555555	Platform:	Apple iOS
Type:	Mobile		

Smartphone? Pair your device.

- On your phone, open the **Duo Mobile App**
- Click **Add Account** or the plus sign on the top right.
- Hold your phone up to the QR code on your computer. It will scan the code and add your account.

Repeat for your other numbers.

Do you have a desk phone? A home phone?
You can click "Add Device" to add them as backups.

4 Generate Bypass Codes

Generate bypass codes on the MyAccount two-step page and keep them in your wallet.

If you forget your phone, or you're out of cell and wifi range, you can use the codes instead.
