

## Adobe Creative Cloud Access on Public Computers

Jeffrey Pierce - 2019-08-28 - Comments (0) - Adobe

Adobe has changed the way they license their software starting in January 2019. This has affected how users who are in the Public Computing Labs (PCL) access the Adobe software.

When using any Adobe products, you will need to either create an Adobe ID or use your existing Brown email address to access the software.

1. Launch the Adobe software you wish to use

The screenshot shows the Adobe ID sign-in dialog box. It features a close button (X) in the top right corner. The main heading is "Sign In" with the Adobe ID logo to its right. Below the heading are two input fields: the first is empty, and the second is labeled "Password". A blue "Sign In" button is positioned below the first field, and a "Forgot password?" link is to its right. Below these elements, there is a link "Not a member yet? Get an Adobe ID". Further down, a question "Want to use your company or school account?" is followed by a link "Sign in with an Enterprise ID". Below this, the text "Or sign in with" is followed by a horizontal line. Underneath the line are two buttons: "Facebook" with the Facebook logo and "Google" with the Google logo. At the bottom left, there is a "Cancel" link.

2. Enter your @brown.edu email address and press Enter
3. Once you identify yourself with your @brown.edu email address, the system will prompt

you to use two-factor to access the software
