

AI-Generated Summaries in Teaching and Learning

Alex Vidmar - 2024-12-09 - Comments (0) - Zoom AI Companion

Several software companies, such as [Zoom](#), now offer AI-generated summaries of synchronous meetings. With thoughtful implementation, these tools can support teaching and learning in higher education settings.

The Sheridan Center's Digital Learning & Design (DLD) team has produced guides for faculty members thinking through the use of Zoom AI Companion features for teaching and learning settings. This article outlines potential uses and practical guidance for instructors interested in integrating AI summaries in their courses.
