

## Attach Custom Question Survey to Course

Melissa Kane - 2022-01-07 - Comments (0) - Course Feedback

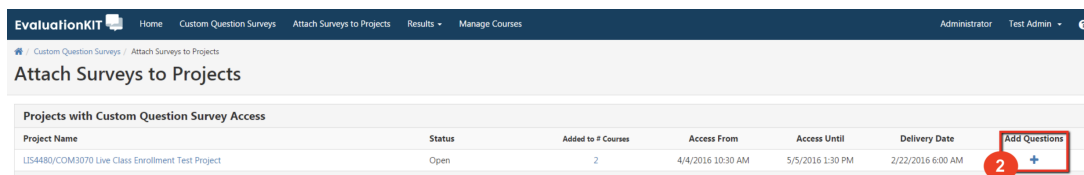

After you have created your customized questions and saved your [Custom Question Survey](#), you must attach it to a current project. While Custom Question Surveys are associated with the individual user, they may only be attached to **currently open projects**.

NOTE: Your home page should look similar to the image below. There may be slight variations in the layout of this page depending on how your administrator has configured your project widgets.

1. From your home page, click the **Attach Surveys to Projects** button at the top of your screen.

2. Select the correct project and click the + symbol under **Add Questions**.

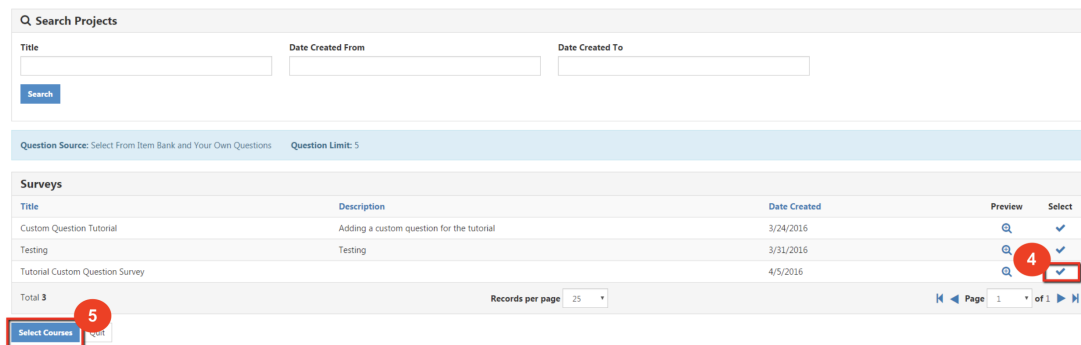

Project Name	Status	Added to # Courses	Access From	Access Until	Delivery Date	Add Questions
1154480/COM3070 Live Class Enrollment Test Project	Open	2	4/4/2016 10:30 AM	5/5/2016 1:30 PM	2/22/2016 6:00 AM	2 +

3. Use the + **Add Custom Question Survey** button at the top left.

4. Use the check mark under **Select** on the right side of the screen to highlight the custom survey you wish to use and click the **Select Courses** button once you have done this.

5. Use the **Select Specific Course** tab and then click the **Add Courses** button.

6. **Select** the desired course to which you'd like to add the custom question, and then use the **Add Selected Courses** button to complete the process.

Upon completing the final step, you should receive a pop up notification indicating that your survey has been added to course(s) successfully.
