After you have created your customized questions and saved your [Custom Question Survey](#), you must attach it to a current project. While Custom Question Surveys are associated with the individual user, they may only be attached to **currently open projects**.

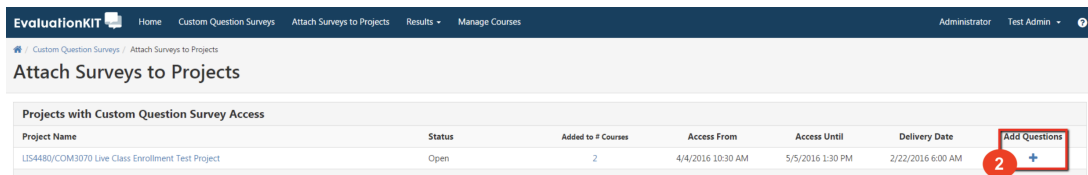

NOTE: Your home page should look similar to the image below. There may be slight variations in the layout of this page depending on how your administrator has configured your project widgets.

1. From your home page, click the **Attach Surveys to Projects** button at the top of your screen.

The screenshot shows the EvaluationKIT home page. The navigation bar at the top includes 'EvaluationKIT', 'Home', 'Results', 'Custom Question Surveys', and 'Attach Surveys to Projects'. A red circle with the number '1' highlights the 'Attach Surveys to Projects' button. Below the navigation bar, there are two widgets: 'Manage Courses' which displays 'No Courses found./td>' and 'Custom Questions' which displays 'Summer 2019 Course Feedback' with status 'Closed', access from '7/16/2019 12:00 AM', and access until '7/30/2019 6:00 AM'.

2. Select the correct project and click the + symbol under **Add Questions**.

The screenshot shows the 'Attach Surveys to Projects' page. The page title is 'Attach Surveys to Projects'. Below the title, there is a table titled 'Projects with Custom Question Survey Access'. The table has the following columns: Project Name, Status, Added to # Courses, Access From, Access Until, Delivery Date, and Add Questions. A red circle with the number '2' highlights the '+' symbol in the 'Add Questions' column for the first project.

Project Name	Status	Added to # Courses	Access From	Access Until	Delivery Date	Add Questions
