

## Attaching PDFs to videos in Panopto

Stephanie Obodda - 2025-01-31 - Comments (0) - Panopto

### **How to add a PDF to a video in Panopto**

Panopto allows you to attach one or more PDF files to a video that will display as a source in the player for viewers to select while watching a video. It will display like a normal PDF in a browser.

1. Once you have a video uploaded you can attach a PDF by going into the video **Settings by hovering over the video and selecting the button.**

2. On the left hand side of settings click **Streams**

**Instructc**

Choose File | No file chosen | Upload PDF

The PDF should immediately show under the PDF Documents and you have the option to delete if necessary.

### PDF Documents

#### Filename

UploadUserGuide.pdf

Delete

Repeat this step for multiple PDF attachments.

4. The PDF will appear alongside a single video file. Viewers can scroll through the PDF while watching the video or they can choose to go full screen to watch just the video.

The screenshot shows the Panopto interface. On the left, there is a video player showing a dark room with a person. Below the video player is a search bar and a notes section. The main content area displays a PDF document titled "HOW TO BATCH UPLOAD VIDEO FILES". The PDF content includes instructions on how to upload video files, with a "Create" button highlighted in a red box. The bottom of the interface shows a video player control bar with a progress bar and volume controls.

If attaching a PDF to a lecture capture or a dual source recorded video the PDF will appear as selectable option for the viewer in the right side window:
