

Author Tip | Add a Brown Logo to a Cognos Analytics Report

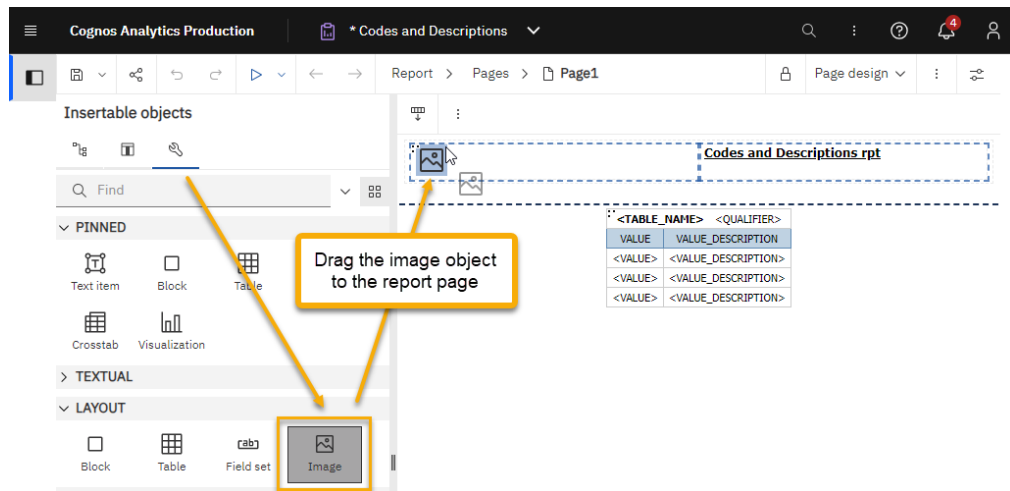

Wendi Lewis - 2023-11-22 - Comments (0) - Cognos Analytics

Brown logos (plus a other images authors have requested over the years) are available to report authors to add to Cognos Analytics reports. The available Brown logos are the same files that are available for download from the [Brown Image Gallery](#).

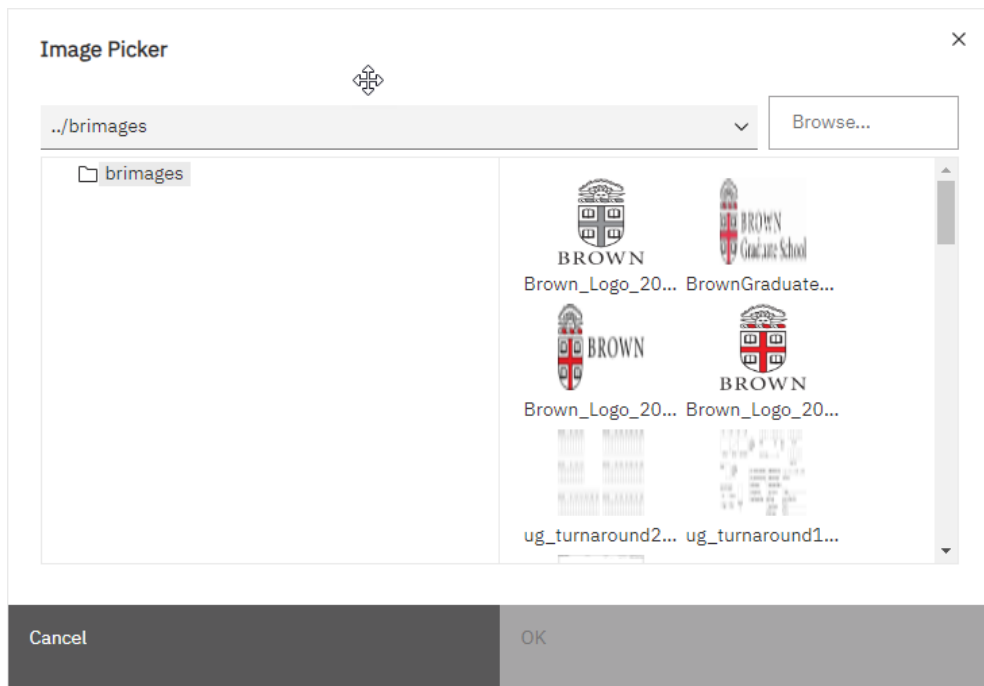

NOTE: [Contact us](#) if you need a logo or other image added to the Cognos Analytics to use in reports.

The main thing to remember is that Brown logos are available in a directory you access from **../brimages**.

1. In the report authoring tool, navigate to the report page where you want to add a logo.
2. From the **Toolbox** pane, expand **LAYOUT**, and then drag an **Image** object to your report page.

3. Double click the image object, then in the **Image Picker** field, type **../brimages**, and then press **Enter**.
Available logos and images appear.

4. Select an image, and then click **OK**.
The system adds the image to your report.
5. Brown logos default to the sizes they are provided in the [Brown Image Gallery](#), which is typically quite large. Select the image and then from the **Show properties** pane, use the **Size & overflow** property to adjust the image size.
