Author Tip | Add an Icon or Brown Logo to a Cognos Analytics Report

Wendi Lewis - 2026-04-29 - Comments (0) - Cognos Analytics

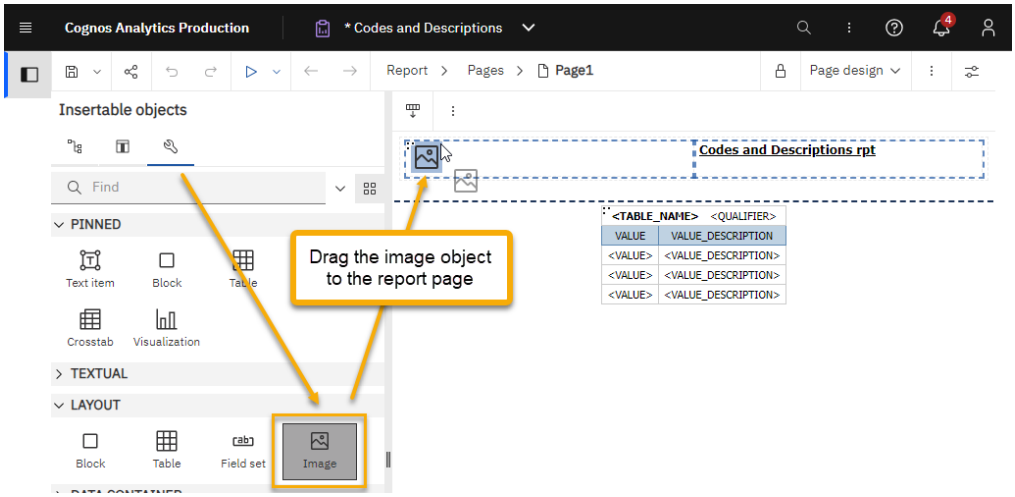
Introduction

Cognos Analytics authors can add images to reports and prompt pages like Brown logos, custom images, and bootstrap icons .

NOTE: Contact us if you need a logo or other image added to Cognos Analytics to use in reports.

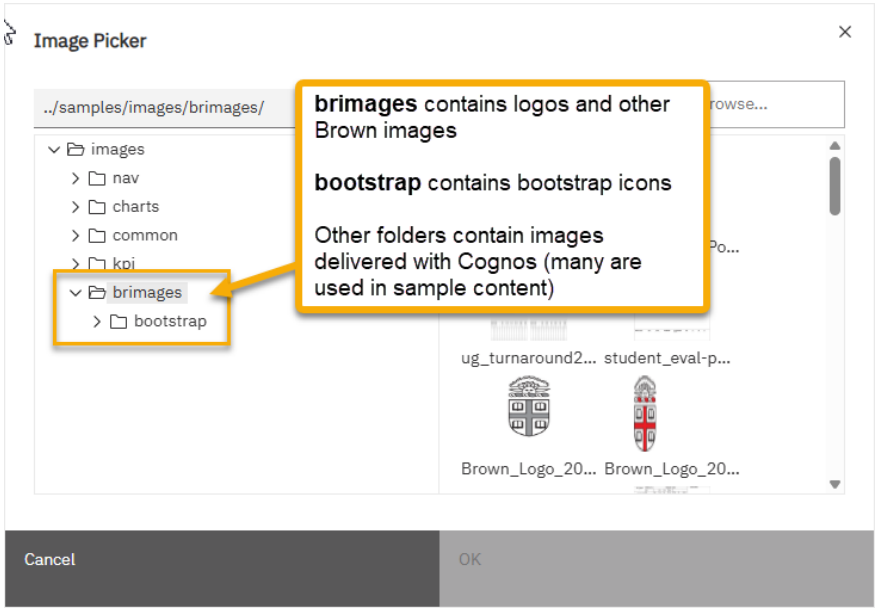
Add an Image to Your Report

1. In the report authoring tool, navigate to the report page where you want to add an image.
2. From the **Toolbox** pane, expand **LAYOUT**, and then drag an **Image** object to your report page.



3. Double click the image object, and then click **Browse**.

   An image directory appears.



4. Select an image, and then click **OK**.

   The system adds the image to your report.

5. To adjust the image size, select the image and then from the **Show properties** pane, use the **Size & overflow** property to adjust the image size.
   NOTE: Brown logos default to the sizes available in the [Brown Image Gallery], which is typically quite large.
