## Browsers Compatible with Cognos Analytics

Stephanie Obodda - 2020-11-14 - 0 Comments - in Cognos Analytics

The following browsers are compatible with Cognos Analytics 11.1.4.

| Browser           | Version        | Supports legacy studios?<br>(Query Studio, Analysis Studio) | Supports drill through reports in PDF format? |
|-------------------|----------------|-------------------------------------------------------------|-----------------------------------------------|
| Chrome            | latest release | NO                                                          | NO                                            |
| Firefox ESR       | 68             | YES                                                         | NO                                            |
| Internet Explorer | 11             | YES                                                         | YES                                           |
| Microsoft Edge    | 44             | NO                                                          | NO                                            |
| Safari            | 9, 10, and 11  | NO                                                          | NO                                            |

## Enable Popups

Browsers treat Excel report formats (and PDF if it opens outside the browser) as pop-ups.

Add [reporting.brown.edu](http://reporting.brown.edu) (and any other Cognos Analytics environment you use) as an exception to your pop-up blocker settings.
