Canvas Student View for Instructors

Stephanie Obodda - 2022-02-10 - Comments (0) - Design and Build Your Course

You can use course settings to enable student view to see how your students see the course:

1. Log in to Canvas at canvas.brown.edu.
2. Select your course from the Global Navigation menu on the left.
3. Click **Settings** in the Course Navigation menu.
4. Click **Student View** on the right.

You will now view your Canvas course as your students see it. Note that the display in the upper-right corner has changed from your name to Test Student.

5. When you have finished using student view, click **Leave Student View** in the the bottom-right corner. The display name will return from Test Student to your name and you can continue working with your Canvas course as before.
