

Clear Cookies and Cache

Jorge Davila - 2024-06-27 - Comments (0) - Support

As changes are made to a web page, these changes may not immediately appear in your browser. This is because a previous version of the web page was cached. Clearing your cache is needed to prevent your browser from referring to the last cached page. You may be asked to do this when getting help from tech support.

Mobile browsers

Android

The steps to clear your cache, cookies, and history may differ depending on the model of your Android device and your preferred browser, but you should be able to clear your cache and data from your application management settings menu:

1. Go to Settings and choose Apps or Application Manager.
2. Swipe to the All tab.
3. In the list of installed apps, find and select your web browser. Select Clear Data, and then Clear Cache.
4. Exit/quit all browser windows and re-open the browser.

Chrome for Android

1. Select Chrome menu, then Settings, and then (Advanced) Privacy.
2. From the "Time Range" drop-down menu, choose All Time.
3. Check Cookies and Site data and Cached Images and Files. Select Clear data.
4. Exit/quit all browser windows and re-open the browser.

Safari for iOS

1. Open your Settings app.
2. Select Safari.
3. Select Clear History and Website Data and confirm.
4. Exit/quit all browser windows and re-open the browser.

Chrome for iOS

1. Select Chrome menu, then Settings, and then Privacy.
2. Select Clear Browsing Data.
3. Choose the data type you want to clear, and then select Clear Browsing Data.

4. Exit/quit all browser windows and re-open the browser.

Desktop browsers
