Connect Chrome OS to Brown's Wireless Network

Kyle Oliveira - 2018-02-23 - Comments (0) - Brown Wireless

If you're having difficulty logging onto the wireless network, make sure your username and password are working by going to <https://myaccount.brown.edu> and logging in. You can contact the IT Service Center for username and password issues or you continue to have issues connecting to the WiFi.

Go To wifi.brown.edu

While on Brown-Guest, connect to the wireless as shown below. Go to wifi.brown.edu and follow the onscreen steps.

Brown (secure)

Brown (secure) WiFi uses your **Brown username and password**. Make sure to use your username in **all lowercase** letters. Using an uppercase letter will cause an authentication issue.

Eduroam

Eduroam uses your Brown **username@brown.edu** and password. This is your short Brown username, **not your Brown email address**.

Manual Settings

If the default method does not work, you can just tap on Brown within your wifi list and plugin the following. This is not recommended as it is not secure.

SSID	Brown --OR-- eduroam
EAP Method	PEAP
Phase 2 Authentication	Automatic
Server CA certificate	Default
Subject Match	[LEAVE BLANK]
Identity	Brown - Use your Brown username (all lower case) eduroam - User you Brown Username in this format: username@brown.edu
Password	This will be your Brown Password
Anonymous Identity	[LEAVE BLANK]
