Connect to Brown's VPN on a Chromebook

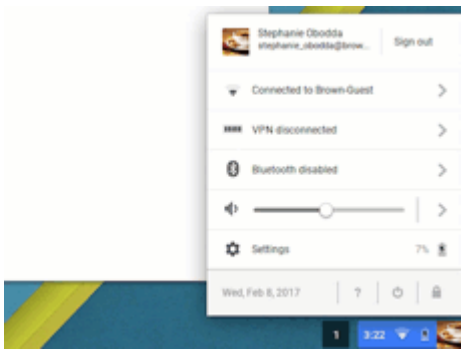
Stephanie Obodda - 2018-09-14 - Comments (0) - VPN

Initial Setup

1. In the Chrome Webstore, search for **F5 Access** and install it
2. Open F5 Access
3. Click the plus sign icon (+) to add a new profile
4. In the form that appears, enter the following settings and Save
   Name: Brown (you can alter this if you wish, it's just for your reference)
   Server URL: https://vpn.brown.edu
   Web Logon: Checked
   Client Certificate: NOT checked

To Connect

1. Click the network icon on the bottom right of your Chromebook screen
2. Choose "VPN Disconnected"
3. Click "Brown" (if you chose a different name for your profile in step 4 above, you'll see the name you entered instead)



4. Log in with your Brown username and password. You will be asked to verify with two-step (unfortunately, Remember Me will not work here)
5. The F5 window will show that you are Connected.
