Connect to Brown's VPN on a Chromebook

Stephanie Obodda - 2018-09-14 - Comments (0) - VPN

Initial Setup

- 1. In the Chrome Webstore, search for $\ensuremath{\textbf{F5}}\xspace$ Access and install it
- 2. Open F5 Access
- 3. Click the plus sign icon (+) to add a new profile
- In the form that appears, enter the following settings and Save Name: Brown (you can alter this if you wish, it's just for your reference) Server URL: https://vpn.brown.edu Web Logon: Checked Client Certificate: NOT checked

To Connect

- 1. Click the network icon on the bottom right of your Chromebook screen
- 2. Choose "VPN Disconnected"
- Click "Brown" (if you chose a different name for your profile in step 4 above, you'll see the name you entered instead)

- 4. Log in with your Brown username and password. You will be asked to verify with twostep (unfortunately, Remember Me will not work here)
- 5. The F5 window will show that you are Connected.
