## Connect To Brown's VPN On Android

Stephanie Obodda - 2017-06-22 - [0 Comments](#) - in [Virtual Private Network](#)

*This was tested on a stock 6.0.1 Marshmallow version of Android. Version 4.0+ and other flavors provided by other manufacturers should be nearly the same, but have not been tested.*

---

### Launch Play Store

Open Google Play store. This icon is usually found on your home screen, but it will most definitely be in your Apps.

Search for the app called "**F5 Access**" and install it--or click the icon below.

Once installed, it will be visible as a new icon your home screen.

### Launch F5 Access

1. Launch the Edge Client on your device and click on **CONFIGURE SERVER**:
- 

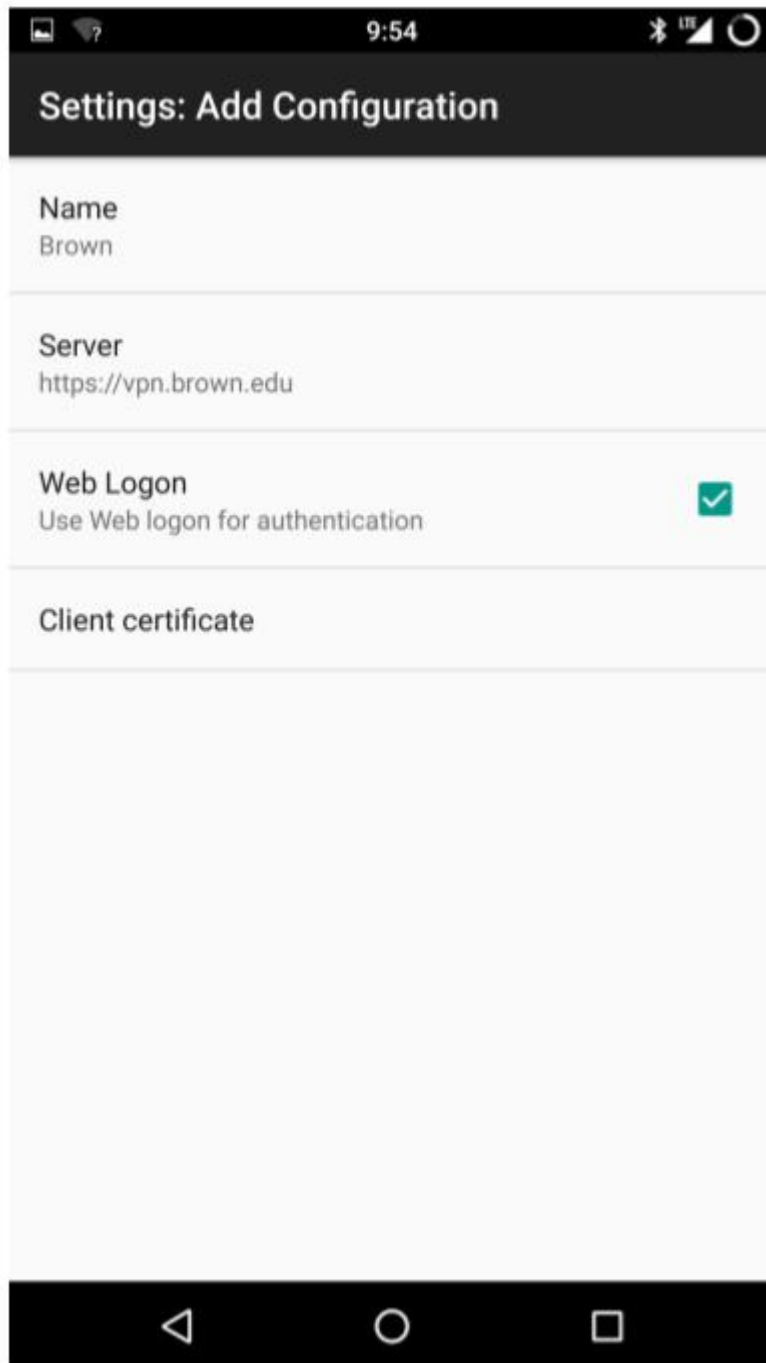

## F5 Access

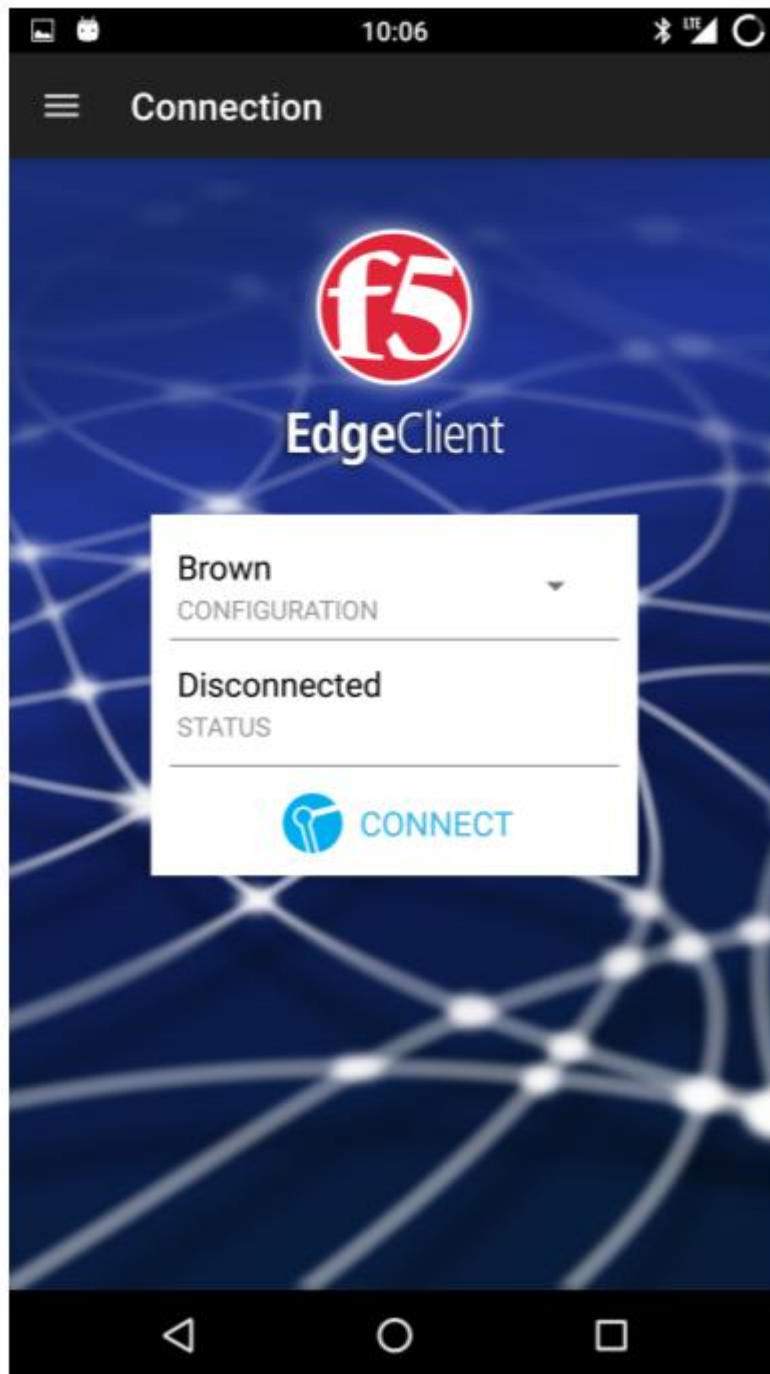

F5 Networks Inc. Productivity

**E** Everyone

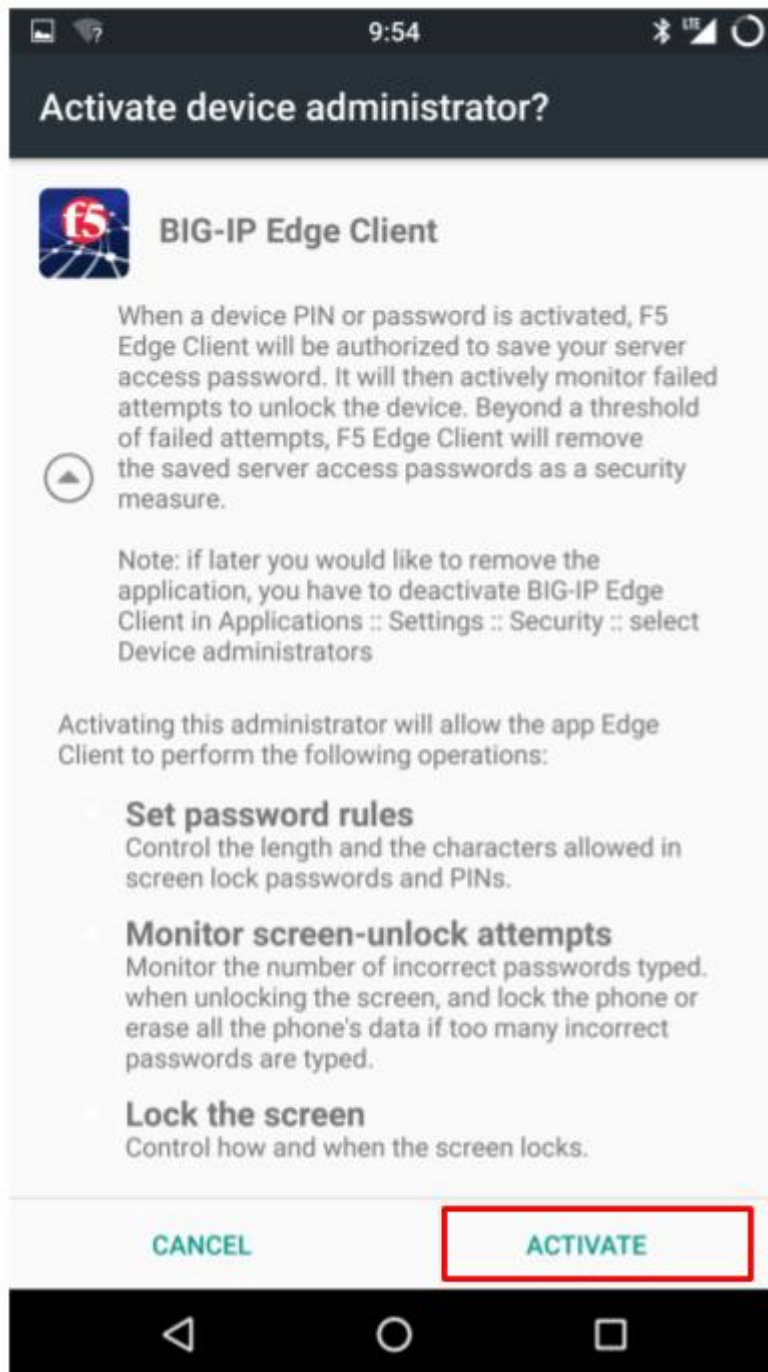

- Match the settings of your app with the settings below:  
Name = Brown  
Server = vpn.brown.edu  
Web Logon = Should be checked

- Press the **BACK** key once all the information has been set then tap **CONNECT**.

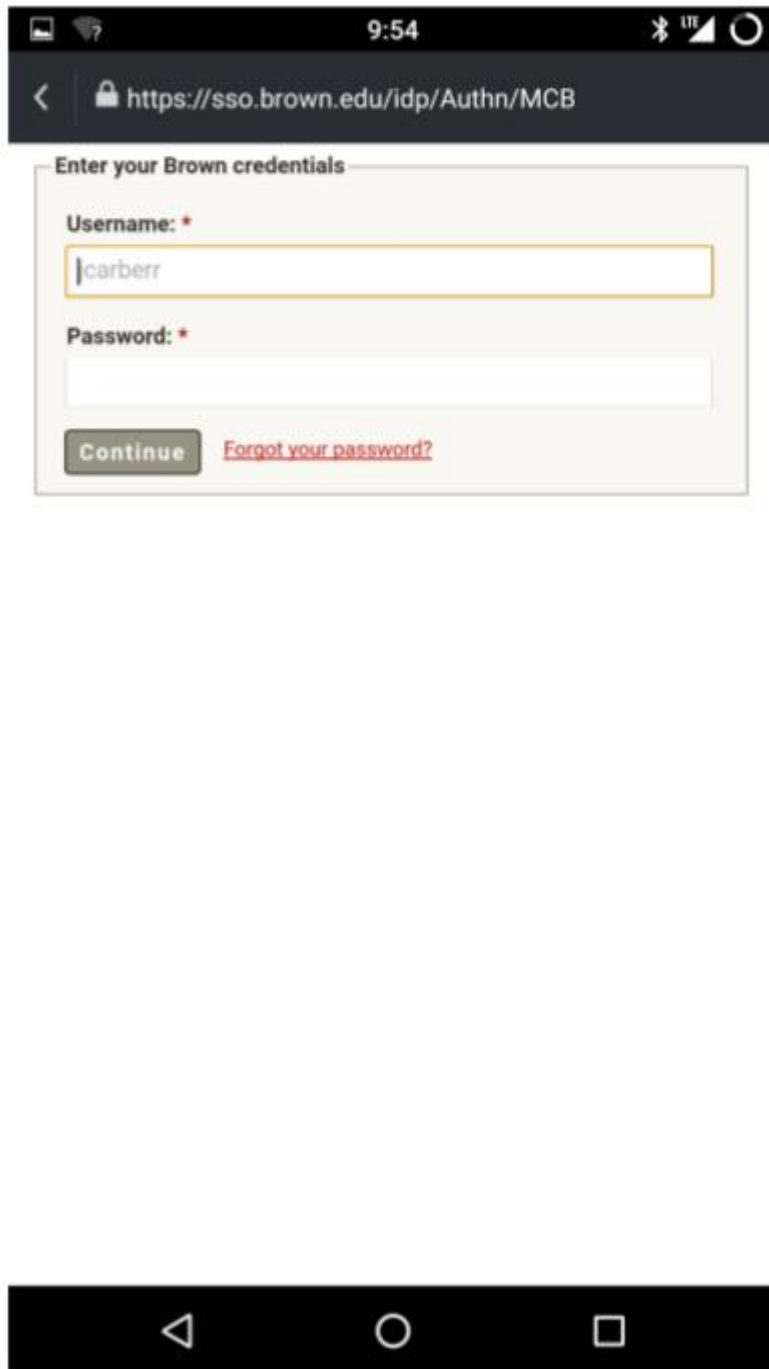

4. Press Connect and you should be prompted to **allow** BIG-IP **Administrative** access; this is **required** on your device if you want to use the VPN and is a security measure if necessary.

\*\*\*Press **Activate** and you may be asked to create a **pin or password** for your phone if you do not have one already. Choose which method you prefer and create a easy to remember but difficult to figure out password or PIN. Add and confirm your PIN/Password and then click done. This should bring you back to the EdgeClient and start to connect to VPN.

5. You will be brought to a Brown login; two-step will also be required.

6. You may also see a popup regarding the application wanting to create a VPN connection, which we do so click OK to this prompt. You should then be connected to the VPN.

You should then be connected to Brown VPN. You can tap **DISCONNECT** to end your VPN session. You will be required to sign in and two-step authenticate when initializing a VPN connection.
