

Connect to MyApps on iOS and Android

Nicholas Geleney - 2021-10-06 - Comments (0) - RemoteApp

You can connect to the MyApps service from a web browser on any platform via <https://aka.ms/wvdwebarm> but the experience in a mobile browser will be less than ideal. It is highly recommended to use the Remote Desktop (RD) mobile app for a better user experience.

iOS

1. Download the [Remote Desktop Mobile app](#) from the iOS app store
2. Launch the RD Client app, click on the "+" in the top right, click "Add Workspace"
3. Enter <https://rdweb.wvd.microsoft.com> for the Workspace URL, click Next
4. Enter your Brown Username in Microsoft format: [username@ad.brown.edu](#) (ex. [jcarberr@ad.brown.edu](#))
5. You will be redirected to authenticate with your Brown username and password
6. Once you have successfully authenticated you will see any MyApps Desktops you entitled to under the workspaces tab

Android

1. Download the [Remote Desktop app](#) from the Google Play store
2. Launch the RD Client app, click on the "+" in the top right, click "Add Workspace"
3. Enter <https://rdweb.wvd.microsoft.com> for the Workspace URL, click Next
4. Enter your Brown Username in Microsoft format: [username@ad.brown.edu](#) (ex. [jcarberr@ad.brown.edu](#))
5. You will be redirected to authenticate with your Brown username and password
6. Once you have successfully authenticated you will see any MyApps Desktops you entitled to under the workspaces tab
