

Connect to MyApps on macOS

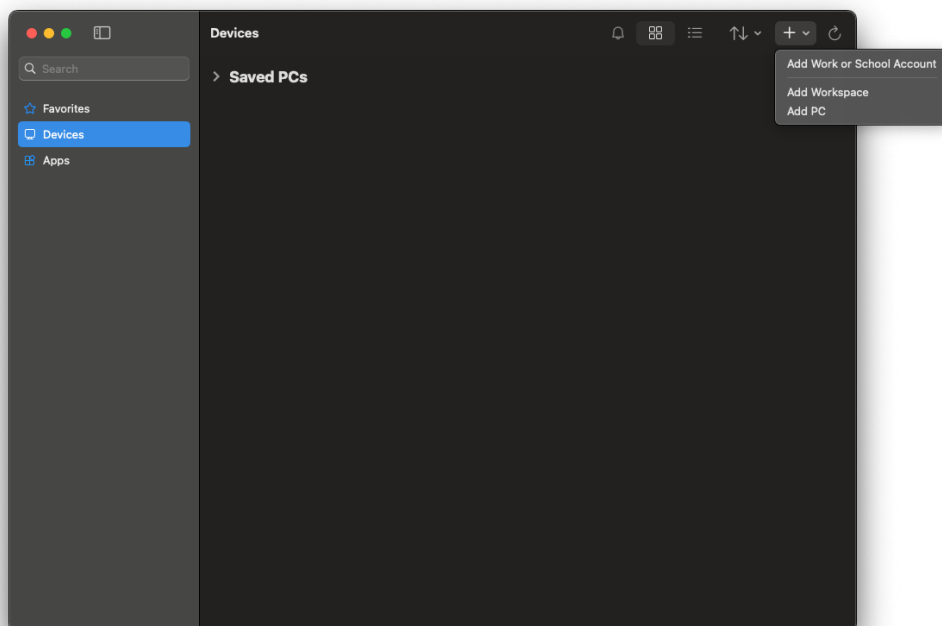

Nicholas Geleney - 2026-03-24 - Comments (0) - MyApps

NOTE: If you are encountering issues accessing MyApps via the the website myapps.brown.edu as of March 24, 2026, please use the website <https://client.wvd.microsoft.com/arm/webclient> or the **Windows app as a workaround until this issue is resolved.**

You can connect to the MyApps service from a web browser on any platform via myapps.brown.edu or client.wvd.microsoft.com/arm/webclient, but Windows App (formerly Microsoft Remote Desktop) can provide a better user experience. Installing the Windows app will be more convenient for frequent usage of MyApps.

To install and configure Windows App, please follow these steps:

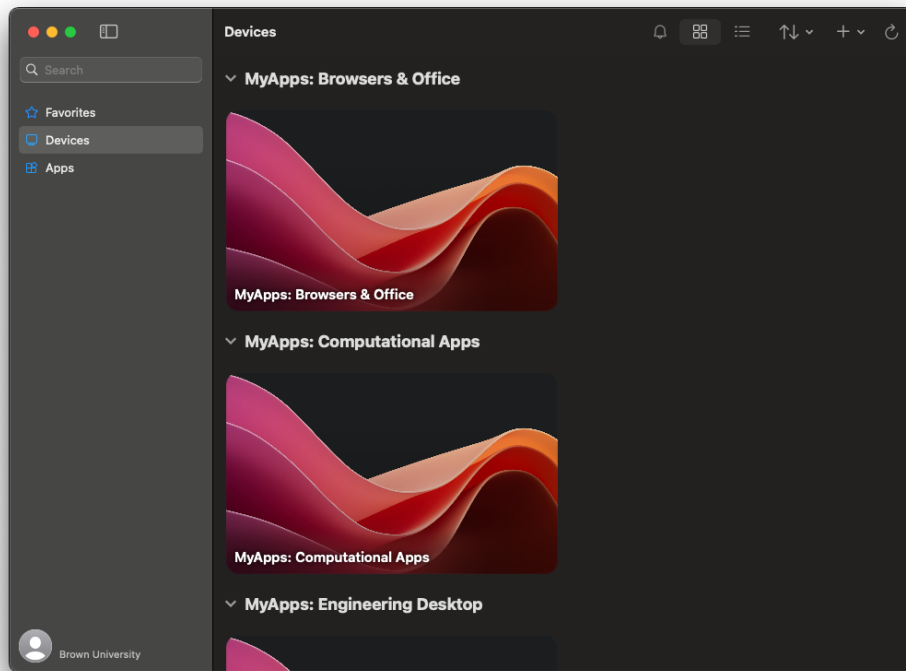

1. Download and install the latest release of Windows App via the [Mac App Store](#).
Note: If you are using a Brown-managed machine, you can install it via [Jamf Self Service](#).
2. Launch Windows App and click + > **Add Work or School Account**.

3. Enter your Brown username in Microsoft format: username@ad.brown.edu (ex.

jcarberr@ad.brown.edu)

4. You will be redirected to authenticate with your Brown username and password.
5. Once you have successfully authenticated you will see any MyApps Desktops you are entitled to.

6. Double-click on a MyApps Desktop to launch a session and connect.
7. You can hover over each MyApps Desktop and click on the ellipsis (...) to configure custom display settings.
8. If you have more than one Brown Microsoft account, repeat steps 2-5.

For more information about MyApps, please reference the article [Get Started with MyApps at Brown](#).
