

Connecting to the printer in 70 Ship St. room 519 from Windows

David Blair - 2022-11-29 - Comments (0) - Departmental Printing

Connecting to the printer in 70 Ship St. room 519 from a Windows computer

1. Make sure you're connected to the Brown (secure) WiFi, using the VPN, or using a wired network connection on the Brown campus
2. Open the Run dialog by pressing the Windows key + R, or by clicking Start, searching for "Run", and then clicking on the app called "Run"
3. In the dialog/window that pops up, enter \\ppcutprutilcit.ad.brown.edu, and then click OK. It should look like this:

1. If prompted to enter a username and password for the printer, use your Brown username and password
4. Double click on the printer "PLM-70Ship519-BW" or "PLM-70Ship519-Color" to add it to your system
5. Print a test page to make sure it worked
6. Repeat steps 2-3 and then double-click on the other printer if you'd like the ability to print to both
