

Enable Automatic Captions in Panopto

Kyle Sloane - 2023-09-06 - Comments (0) - Panopto

Panopto offers automatic captioning for any video or audio files uploaded to a course folder. This option is not on by default but can be easily turned on by following these instructions.

Captions for entire folder

1. Navigate to the course folder which you have Creator access and **Click the "Folder Settings" Button** in the top right corner.

2. In the *Overview Window* click on the **Settings** tab on the left side

caption

Overview
Share

Search
Order
Manage

3. In the *Captions* section you will be able to **select Automatic Machine Captions** from the drop down.

Captions

Sessions added to this folder will be sent out for captioning immediately without the opportunity to edit the session. Caption requests for these sessions will use the full primary streams, not the edited session.

Automatically caption new sessions using

Automatic Machine Captions

Panopto machine speech recognition for captions.

This will provide automatic captions for any new files uploaded to the folder. This setting is *not* inherited by subfolders and would need to be turned on for any newly created subfolders.

Captions for individual videos

If you need to add automatic captions to existing video or audio files you can do this by

hovering your mouse over the video and **clicking Settings**

On the left side **click Captions** , **select Automatic Machine Captions** from the *Request Captions* field and **click Order**.

Request Captions

Once you click the "Order" button, the session will not be editable until the captions have returned. If this session is edited after the captions have been added, the entire session may need to be re-captioned.

Estimated Total Caption Time **1 minute(s)**

Service level **Automatic Machine Captions**

Panopto machine speech recognition for captions.

Order

Following these steps on the folder or video will instantly embed the captions on the video .
Viewers can turn on and off captions by clicking the (CC) button at the bottom of the player.
Closed captions also provide a searchable transcript next to the video player.

Captions

If you recall here is the structure of the car box gas and over here this is basically

the functional group that we think about being the car back so gas and now are gonna be adding sodium high

peroxide and again if you call from general chemistry when we have an acid and base station react together that your components that you get when they react together.

our assaults and then water

now why is this important well when you think about it now we have changed the property of that compound and it no longer is neutral. what we start to notice that it's no longer neutral

in there. and this compound

now becomes water soluble again you have this charger over here that makes the molecule

very water soluble and then as a result of that given the choice of going into apple acetate or going into water, it's going to favor the water over the apple acetate

and if you were call from experiment you had mention about the fact that this is sometimes

Isolation of compound with Carboxylic Acid group

- Why is NaOH is used to extract the organic layer?
- Why is HCl added to the aqueous layer before filtration?

Water soluble, can separate from neutral compound

now becomes water soluble again you have this charger over here that makes the molecule

NOTE: Automatic Machine Captions are not intended for accessibility needs. If there is a need for human transcribed captioning for a SAS registered student please contact captioning@brown.edu to have this paid service enabled for your course.
