Finding your computer name in Windows

Kyle Oliveira - 2021-04-12 - Comments (0) - Windows and PC Computers

Windows Search

1. Open the **Start Menu** and type in **about**
2. Click on **About your PC**
3. Your "**Device name**" is your computer name.

Control Panel

1. Open **Control Panel**
 - You can use WIN+R and then type in **control**, then press enter.
2. Click on **System and Security**
3. Click on **System**
4. Your "**Device name**" is your computer name.
