## Format Content

Stephanie Obodda - 2016-01-27 - Comments (0) - Edit Content

Once you are in [edit mode](#) and can access the Body field, enter text as you would with any word processing software or [paste in your content](#). You can then add headings, bold text, links, bullet lists and other formatting by selecting text and clicking the proper button in the WYSIWYG (what-you-see-is-what-you-get) toolbar.
