# Format Content

Stephanie Obodda - 2016-01-27 - Comments (0) - Edit Content

Once you are in edit mode and can access the Body field, enter text as you would with any word processing software or paste in your content. You can then add headings, bold text, links, bullet lists and other formatting by selecting text and clicking the proper button in the WYSIWYG (what-you-see-is-what-you-get) toolbar.
