These features require additional licensing. [Submit a request](#) and provide business purposes for your use.

Multi-Send

Google Article: [Use multi-send for email marketing, newsletters, and announcements](#)

You can use multi-send mode in Gmail to:

- Create email campaigns.
- Send newsletters and announcements.
- Personalize your email with mail merge.

When you add someone to the “To” field, multi-send emails each contact individually. Recipients won’t know who else you emailed. You'll also get replies in separate threads, making conversations easier to manage.

Please note that [Gmail limitations](#) apply.

Layouts

Google Article: [Create branded emails with customized layouts](#)

Customize templates that you can apply to your emails:

- Logos
- Colors
- Fonts
- Images
- Footer Details
- Links
