

How to Enable or Disable BitLocker

Jeffrey Pierce - 2019-05-21 - Comments (0) - Encryption

To Enable BitLocker:

1. Launch “Software Center” from the start menu
2. From Software Center, select: “Encrypt This Computer” and click “Install”

The following screens will appear during installation:

When finished you will see this screen in Software Center:

[Applications](#) > Application Details

Encrypt This Computer

Reinstall

Installs and enables BitLocker encryption. Requires a properly configured TPM.

Status: **Installed**

Date published: 1/26/2017

Restart required: No

Download size: Less than 1 MB

Estimated time: 0 minutes

Total components: 1

How to Confirm Hard Drive is Encrypted

1. From Start Menu Type: BitLocker
2. Select "Manage BitLocker" option
3. The following screen will appear with the BitLocker Status:

Operating system drive

Windows (C:) BitLocker on

-  Suspend protection
-  Change how drive is unlocked at startup
-  Back up your recovery key
-  Turn off BitLocker

~~~~~

### To Disable BitLocker:

1. Go to Control Panel
2. Select "BitLocker Drive Encryption"
3. Select "Turn off BitLocker"
4. This will take some time to run before the drive is completely un-encrypted

## Operating system drive

---

Windows (C:) BitLocker on

-  Suspend protection
-  Change how drive is unlocked at startup
-  Back up your recovery key
-  Turn off BitLocker

## Fixed data drives

### Removable data drives - BitLocker To Go

Insert a removable USB flash drive to use BitLocker To Go.
