## How to Enable FileVault 2 Using Self Service

David Boyd - 2018-07-12 - Comments (0) - Encryption

1. Locate and open the Self Service app in the Applications folder

2. Select "IT Support Tools" from the left-hand sidebar

3. Click the "Encrypt" button under "Encrypt my Computer"

4. Click the "Encrypt" button to enable

•••		
	Encrypt My Computer	
	Encrypt my computer at next login by enabling Apple FileVault. Ensure you are connected to power. Your computer will restart. <i>Run when requested by your ITSC or DCC</i> .	
	Close Encrypt	

5. At this point, encryption is deferred until the next login. Follow on-screen dialogs prompting to restart and enable FileVault

Note: To activate FileVault 2 on a computer, the computer must be running macOS 10.8 or later and have a "Recovery HD" partition. Please follow these instructions when requested by your ITSC or DCC.
