

How to Enable or Disable BitLocker

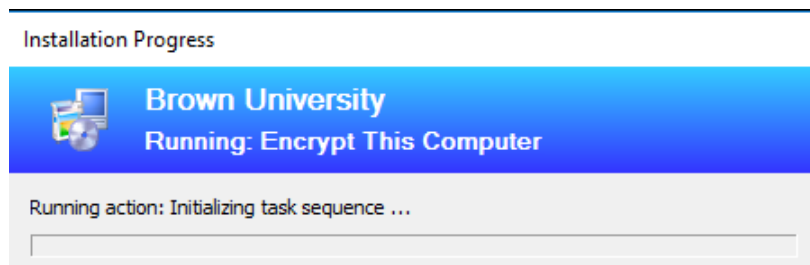

Jeffrey Pierce - 2019-05-21 - Comments (0) - Encryption

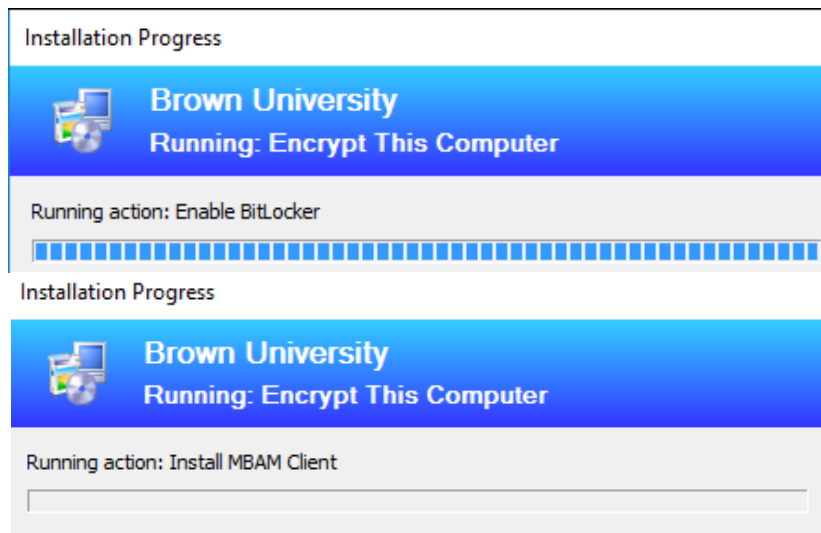

To Enable BitLocker:

1. Launch “Software Center” from the start menu
2. From Software Center, select: “Encrypt This Computer” and click “Install”

The following screens will appear during installation:

When finished you will see this screen in Software Center:

[Applications](#) > [Application Details](#)

Encrypt This Computer

Reinstall

Installs and enables BitLocker encryption. Requires a properly configured TPM.

Status: **Installed**
Date published: 1/26/2017
Restart required: No
Download size: Less than 1 MB
Estimated time: 0 minutes
Total components: 1

How to Confirm Hard Drive is Encrypted

1. From Start Menu Type: BitLocker
2. Select "Manage BitLocker" option
3. The following screen will appear with the BitLocker Status:

Operating system drive

Windows (C:) BitLocker on

- Suspend protection
- Change how drive is unlocked at startup
- Back up your recovery key
- Turn off BitLocker

~~~~~

### To Disable BitLocker:

1. Go to Control Panel
2. Select "BitLocker Drive Encryption"
3. Select "Turn off BitLocker"
4. This will take some time to run before the drive is completely un-encrypted

## Operating system drive

---

Windows (C:) BitLocker on

- Suspend protection
  - Change how drive is unlocked at startup
  - Back up your recovery key
  - Turn off BitLocker
- 

Fixed data drives

Removable data drives - BitLocker To Go

Insert a removable USB flash drive to use BitLocker To Go.
