Keeping your Zoom client updated

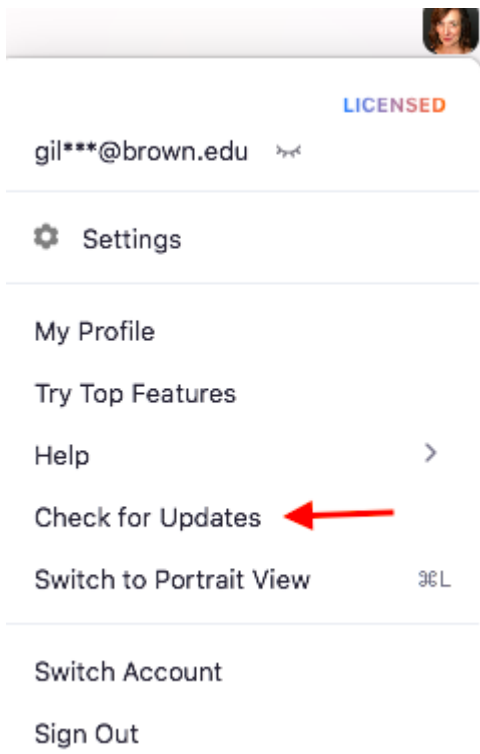

Gillian Bell - 2020-05-19 - [0 Comments](#) - in [Zoom Web Conferencing](#)

First things first: if you haven't set up your Brown Zoom account, please follow the instructions [here](#) to get started.

If you have the Zoom desktop client on your computer, it's important to keep it up to date.

Here's how to check for updates:

1. Sign in to Zoom desktop client.
2. Click your profile picture, then click **Check for Updates**.

If there is a new version, Zoom will download and install it.

Not sure which version you're running? Follow the easy instructions [here](#) to see if your version is the most current.

Keep your Zoom meetings secure! There are tips in this article: [Brown's Enhanced Security Settings for Zoom](#).

Consult the IT Service Center (help@brown.edu) if you need help.
