Learn about Google Jamboard
Jamboard is a collaborative whiteboard used to create and edit content with other users. Jamboard consists of a physical board and an app, but they can be used separately. You don’t need the board to be able to use the app. The physical board is a limited use piece of hardware in one location on campus. We encourage the use of the Jamboard app.

The app is available on any device that runs Android or iOS, such as a phone, a tablet, or an Android-enabled Chromebook. There also is a web-editor version, found at https://jamboard.google.com. The web editor does not have all of the same features as the app or the Jamboard, but it allows users to participate using sticky notes and basic drawing tools. Multiple people can contribute to the board at the same time from any location.

Benefits
Jamboard can be leveraged to build communication, collaboration, critical thinking and creativity. A Jam can be used for a team to brainstorm and develop new ideas. In the classroom you can engage students in problem solving exercises. Jams can easily be shared with students to have access during and after class.

Getting Started
Contact Digital Learning & Design for more information and support. Visit Google Jamboard help to learn more about Jamboard features and tools.

For the physical Jamboard only
If the Jamboard is not connected to wifi, you can connect to Brown wifi using the network information below. The username and password are your Brown credentials.

1. Tap menu.
2. Tap Settings.
3. Tap Wi-Fi.
4. Tap and select the Brown network.
EAP method: PEAP

Phase 2 authentication: MSCHAPV2

CA certificate: Do not validate

Identity: username

Password: password
