

Learn About Reverse Image Search

Lilly Cordova - 2023-12-04 - Comments (0) - General Security

Reverse Image Search can be a useful tool in protecting yourself from online harassment such as [doxxing](#). This search, which can be performed on a regular basis, can help you see if any images such as your professional photo have been shared online without your permission.

You can perform a reverse image search on your most-used photos of yourself through [Google](#), [Bing](#) or using tools like [Tin Eye](#).
