

Learn about Wireless Projection

Stephanie Obodda - 2023-10-24 - Comments (0) - Wireless Projection

Benefits of Wireless Projection

- No need for dongles and cables — project wirelessly!
- Use personal laptops and mobile devices to present.
- Display anything you see on your screen, including video.
- Allow students to share content to the projector from their devices.

Getting Started

Laptop

1. Download the software from our software site: go.brown.edu/AirMedia
2. Connect to the Brown wireless network.
3. Follow our instructions for your [Mac Laptop](#) or [Windows Laptop](#).

Mobile Device

1. Download the Crestron Airmedia app in your app store: [Apple](#) or [Android](#)
2. Connect to the Brown wireless network.
3. Follow our instructions for your [Apple iOS device](#) or [Android device](#).

Wireless presentation from iPads and other mobile devices is limited.

Troubleshooting

My sound doesn't sync with the video I'm showing.

Check your sound settings on your computer.

Who should I contact if I need support?

Contact [Media Services](#) to arrange for support.
