Learn about Wireless Projection

Stephanie Obodda - 2019-08-30 - 0 Comments - in Wireless Projection

Benefits of Wireless Projection

- No need for dongles and cables - project wirelessly!
- Use personal laptops and mobile devices to present.
- Display anything you see on your screen, including video.
- Allow students to share content to the projector from their devices.

Getting Started

Laptop

1. Download the software from our software site: [Brown.edu/go/AirMedia](https://brown.edu/go/AirMedia)
2. Connect to the Brown wireless network
3. Follow our instructions for your [Mac Laptop](#) or [Windows Laptop](#)

Mobile Device

1. Download the Crestron Airmedia app in your app store: [Apple](#) or [Android](#)
2. Connect to the Brown wireless network
3. Follow our instructions for your [Apple IOS Device](#) or [Android Device](#)

Wireless presentation from iPads and other mobile devices is limited.

Troubleshooting

My sound doesn't sync with the video I'm showing

Check your sound settings on your computer.

Who should I contact if I need support?

Contact [Media Services](#) to arrange for support.
