New security certificate for the Brown wireless network - June 2023

Chris DeBlois - 2023-05-26 - Comments (0) - Brown Wireless

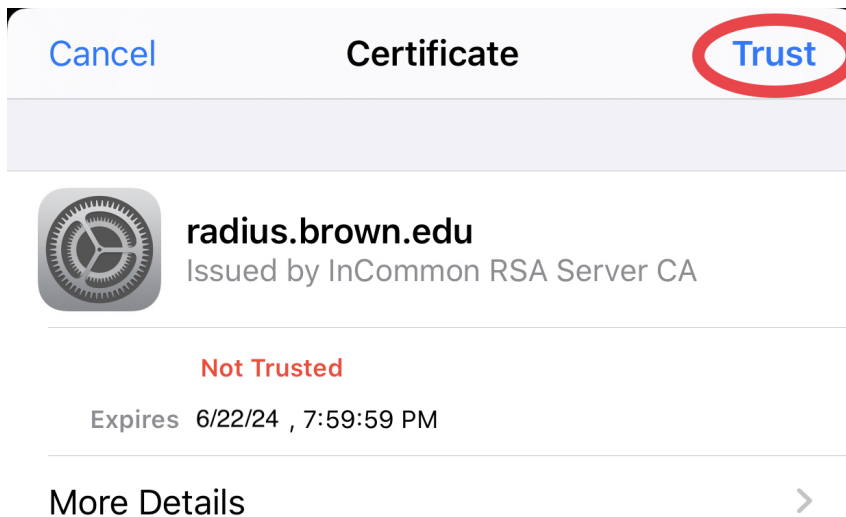

On June 1, OIT will be updating the security certificate on the "Brown" and "Eduroam" wireless networks. While this should be seamless to most Windows and Android users, iOS and macOS users may need to accept the new certificate. The new certificate will be good until June 22, 2024. For more details, see below.

iOS (iPhone and iPad)

If you are prompted to accept the certificate, please enter your Brown username and password and tap "Join."

A screenshot of an iOS 'Enter Password' dialog box. At the top, it says 'Enter the password for "Brown"'. Below this are three buttons: 'Cancel' in blue, 'Enter Password' in black, and 'Join' in blue. The 'Join' button is circled in red. Below the buttons is a light gray rectangular area. Underneath that, there are two input fields. The first is labeled 'Username' and contains the text 'jcarberr'. The second is labeled 'Password' and contains a series of black dots followed by a blue cursor. Below the password field is another light gray rectangular area. At the bottom, there is a 'Mode' label and the text 'Automatic >'.

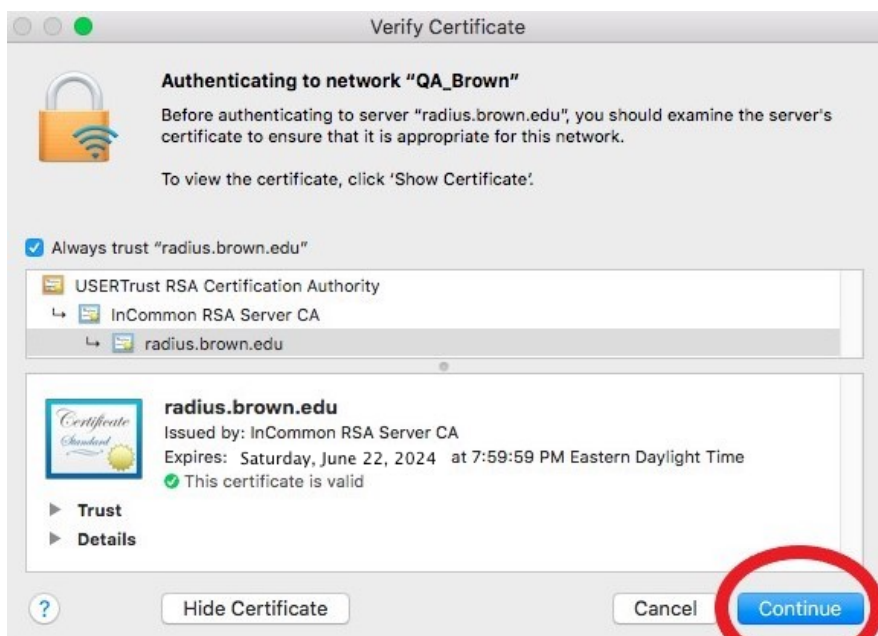

Once the Certificate window opens, tap "Trust".

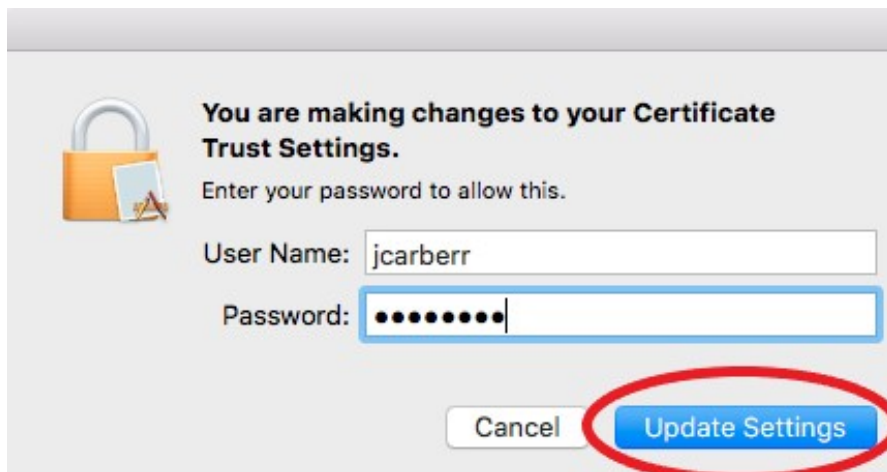

Your iPhone/iPad should complete the wireless connection. You will only have to do this once.

macOS

If you are prompted to accept the certificate, click "Continue".

Enter your Mac username and password, and click "Update Settings".

 **You are making changes to your Certificate Trust Settings.**
Enter your password to allow this.

User Name:

Password:

The image shows a standard MacOS security dialog box. It has a title bar at the top. On the left, there is a lock icon. To the right of the icon, the text reads 'You are making changes to your Certificate Trust Settings.' followed by 'Enter your password to allow this.' Below this, there are two input fields: 'User Name:' with the text 'jcarberr' and 'Password:' with ten dots. At the bottom right, there are two buttons: 'Cancel' and 'Update Settings'. The 'Update Settings' button is highlighted with a red oval.

Your Mac should complete the wireless connection. You will only have to do this once.
