New security certificate for the Brown wireless network - June 2022

Chris DeBlois - 2022-06-06 - Comments (0) - Brown Wireless

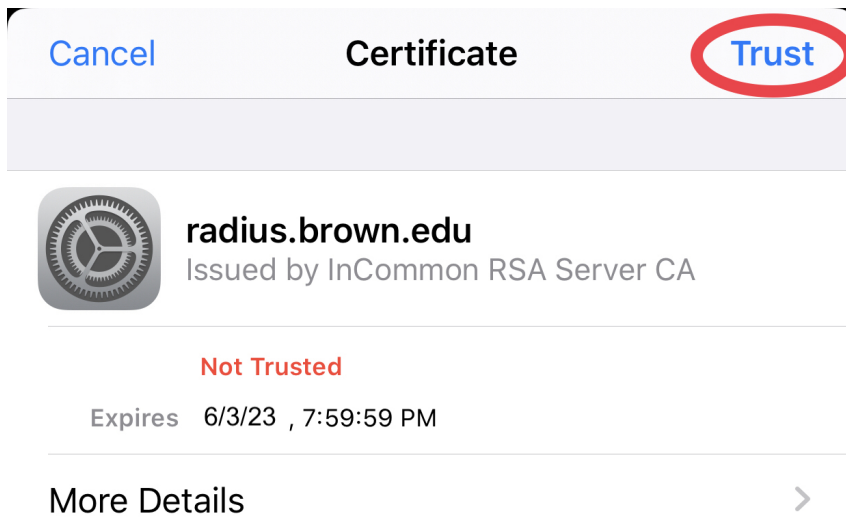

On June 7, OIT will be updating the security certificate on the "Brown" and "Eduroam" wireless networks. While this should be seamless to most Windows and Android users, iOS and macOS users may need to accept the new certificate. The new certificate will be good until June 3, 2023. For more details, see below.

iOS (iPhone and iPad)

If you are prompted to accept the certificate, please enter your Brown username and password and tap "Join."

A screenshot of an iOS dialog box titled "Enter the password for 'Brown'". The dialog has three buttons at the top: "Cancel" (blue text), "Enter Password" (black text), and "Join" (blue text, circled in red). Below the buttons is a grey bar. Underneath, there are two input fields: "Username" with the text "jcarberr" and "Password" with seven black dots and a cursor. At the bottom, there is a "Mode" label and "Automatic" with a right-pointing chevron.

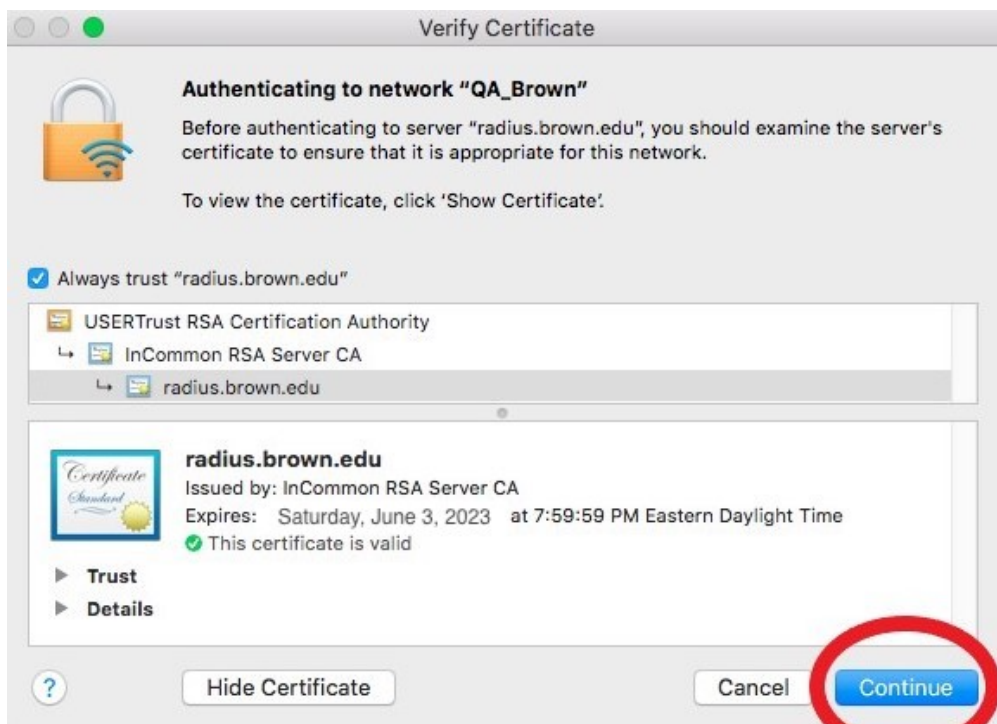

Once the Certificate window opens, tap "Trust".

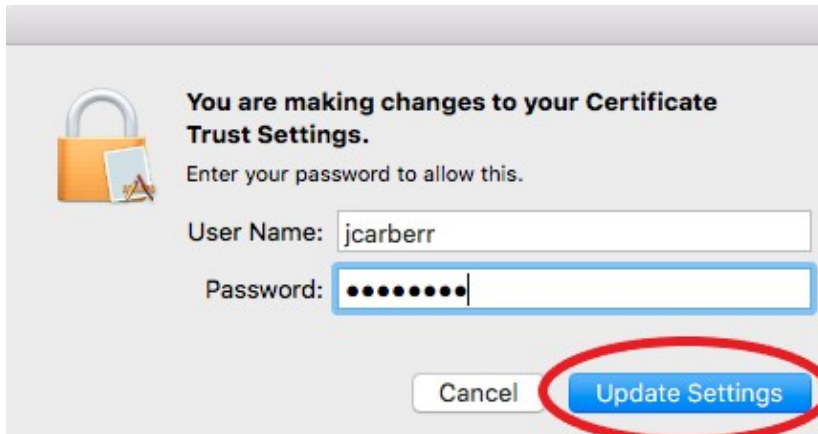

Your iPhone/iPad should complete the wireless connection. You will only have to do this once.

macOS

If you are prompted to accept the certificate, click "Continue".

Enter your Mac username and password, and click "Update Settings".

Your Mac should complete the wireless connection. You will only have to do this once.
