## Print Labels using MyPrint

Stephanie Obodda - 2024-08-02 - Comments (0) - MyPrint

These instructions are for the Windows version of Word.

First: On Your Computer

- In Microsoft Word, create your labels document. In most cases, you will do this by going to Mailings > Labels and choosing the vendor and size of the labels you are printing (e.g., Avery 5160).
- 2. Click the **Print** option on the left menu.
- 3. From the list of printers, choose MyPrint-Pro-BW or MyPrint-Pro-Color.
- 4. Click **Printer Properties**.

$\bigcirc$	
Info	Print
New	Copies: 1
Open	
Save	Print
Save As	Printer
Print	Ready MyPrint-SSL-Color on ppcut
Share	Printer Properties

5. From the One-Click Preset List, choose Labels

📾 \\ppcutprcit.ad.brown.edu\MyPrint-SSL-Color Properties

- 6. Click OK.
- 7. Click Print.

Second: At the Printer

- 1. As usual, swipe your Brown ID card at the printer.
- 2. Locate and open the bypass tray on the side of the printer.

- 3. Place sheet of labels face down.
- 4. As usual, release the print from the touchscreen. (If you're not sure how to do that, see the instructions in the article <u>Pick up Prints from a MyPrint Printer</u>.)
