

Rerun a Failed Cognos Analytics Report

Wendi Lewis - 2023-11-22 - Comments (0) - Cognos Analytics

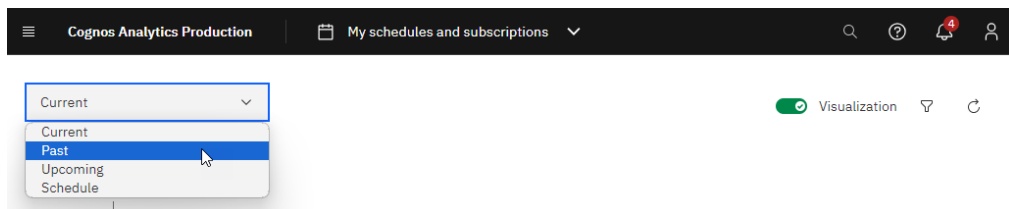

In **My schedules and subscriptions**, use the **Run once** feature to rerun a failed scheduled report when:

- You scheduled it during a [data refresh window](#).
- There was a Cognos Analytics outage, communicated by Office of Information Technology (OIT), that has been resolved.

1. Log in to [Cognos Analytics](#).
2. From the user icon, select **My schedules and subscriptions**.

3. In the upper-left drop-down menu, select **Past**.

4. Use the filter icon to filter the time period for the date/time the schedule was set to run.

The list below shows matching report runs.

5. From the report run Action menu, select **Run once**.
