

Set Up Wi-Fi Calling on an iPhone

Wi-Fi calling can be useful in low reception areas. It's supported on Brown-paid iPhones on AT&T and Verizon and may also work on your personal iPhone as long as you have an iPhone 5c or later [on a supported carrier](#). If your phone and plan support it, here's how to set it up.

On your phone, select **Settings > Phone > Wi-Fi Calling**.

Enable the **Wi-Fi Calling on This iPhone** slider.

If your carrier supports Wi-Fi Calling on iCloud-connected devices, you can also make and receive Wi-Fi calls on other devices. For details, see the Apple article [Make a Call with Wi-Fi Calling](#).
