Shorten Your URL

Stephanie Obodda - 2020-12-02 - 0 Comments - in Basics

New Brown University policies limit the ability of organizations to use acronyms or shortened names in their BrownSite URL. If your organization's URL is too long, you can consider using the [Go URL shortener](#). This service allows you to request a short name or acronym. For example, if your group goes by the acronym UCS, you can request `brown.edu/go/ucs`, as a supplement to your official BrownSite URL.

In addition, you can request a Go URL that goes directly to a specific page on your BrownSite. If an audience of your BrownSite would benefit from a quick, memorable address for a certain page within your BrownSite, you can request something like `brown.edu/go/pagename`.
