If you are seeing spotty performance while on the Brown wireless network please try the following trouble shooting steps:

1. Reboot your device
2. Clear Cookies and Cache in your Browser
3. Run a speed test (go to google and search for speed test. Use the first result)
4. Does issue occur when performing a specific task (playing a game, streaming a movie) or is it consistent no matter what task is performed
5. Update/reinstall drivers on NIC
6. If the issue is on the wireless Brown network reinstall the profile via Cloudpath (https://wifi.brown.edu/)
