Students: Manage the Program Plan in ASK (Summary)

The following is a brief overview of the declaration program plan functionality.

If your concentration is using the program plan, you will see a Course Plan/Program Plan toggle as shown below. Concentrations not using the program plan will just have a simple Course Plan header.

To attach a course to a requirement, click the '+' icon in the upper right. This will allow you to attach a course you have already pulled into the course plan. If the course you want to attach is not in this menu, click **Attach New Course** to add a course to your course plan and attach it to the requirement.

To update or remove an existing course, click the gear icon as shown below. You can then either remove the course from the plan or update it as necessary.

A screenshot of the ASK interface showing a course plan. At the top, it says '8 - 9 credits'. Below that, there is a section for 'ECON0110 (1.0): Principles of Economics (AP, IB OK)'. A red arrow points to a '+' icon in the upper right corner of this section. Below this section is a dropdown menu with 'ECON 0110 (2020-Fall): Principles of Economics' selected and an 'Attach' button. Below that is a section for 'Intermediate Microeconomics' with a green checkmark. Underneath, it says '1 credit'. Below that, there is a section for 'ECON1110 (1.0): Intermediate Microeconomics' with a green checkmark. Below this section, there is a red bar with 'ECON 1110 (1.0) Intermediate Microeconomics' and '2021-Spring' with a green checkmark. A black arrow points to a gear icon in the upper right corner of this red bar. Below the red bar are three buttons: 'Edit Course', 'Show Files', and 'Remove Course'.

As you flesh out the program plan, the credits summary at the top of the program plan will update to indicate how many credits are required, how many are in the plan, how many credits you have completed, and how many are remaining.

Non-Course Requirements

Some programs have non-course requirements, such as internships or theses. All non-course requirements include a file upload component, where you should provide whatever documentation is appropriate. The file upload interface is below the program plan.

Program Plan Validation

Many departments use the program plan to ensure that the program plan is at least theoretically complete before the student can submit the declaration for approval. If there are any gaps in the declaration, ASK will throw an alert such as the following and prevent the submission. If you see this, pay attention to the requirements list and double-check the appropriate sections of your program plan to be sure you have completed everything.

✕

You must complete your program plan before you can submit your declaration for review. The following requirements have not been satisfied:

- Differential Equations
- Option 1
- Option 2
- Computing/Computer Science
- Operations Research
- Statistical Inference
- Elective Course
- Elective Course
- ECON1130 (1.0): Intermediate Microeconomics (Mathematical)
- ECON1210 (1.0): Intermediate Macroeconomics
- ECON1630 (1.0): Econometrics I
- Mathematical Economics
- Data Methods
- Economics Elective
- Economics Elective
- Honors Seminar
- ECON Honors Seminar
- Independent Study
- Thesis
