

Tahoe (macOS 26) - What Works?

David Boyd - 2025-12-02 - Comments (0) - macOS

Apple released their newest operating system, macOS 26 Tahoe, on September 19, 2025. OIT staff have tested a list of commonly-used software and services against the early versions of Tahoe and put results in the table below.

For additional titles, please see a community-sourced chart of app compatibility: <https://roaringapps.com/apps>. This list is not maintained by Brown OIT, but should be helpful with additional information.
