

Use Add-ons in Google Drive

Stephanie Obodda - 2022-05-04 - Comments (0) - Google Drive

You can now enable add-ons in Brown's Google Drive to add functionality to your documents and spreadsheets. For example, add-ons are available to help you send faxes, create a bibliography, or translate text. Please consider that most add-ons were developed by third parties; many require permission to access all of your documents and your agreement with the app's own terms of service and privacy policy. Using an Add-on is similar to using any consumer service online - read and carefully consider policies and permissions before enabling. You can choose to disable an add-on at any time. At Brown, you will be unable to use any Add-Ons that require payment.
