Use Team Drive at Brown

Stephanie Obodda - 2018-08-08 - 0 Comments - in Google Drive

Until now, everything that you’ve created in Google Drive has lived in a place called “My Drive.” **Starting on August 14th, 2018** you’ll see a second place to create content: Team Drive. Team Drive is designed to help groups collaborate. All content of a Team Drive folder is owned by the team instead of an individual, and the same people have consistent permissions to all content in the folder.

Though Team Drive has advantages, it may or may not be a good fit for your use case. We recommend reading this article to understand if it meets your needs.

**How it Works**

- Content in a Team Drive is not owned by an individual, it is owned by the team.
- When you create and share a Team Drive, everything in the Team Drive, including any subfolders, are accessible to anyone with access to the Team Drive. In other words, if you make someone an editor of the Team Drive, they can edit every folder and file in the drive.
- Unlike regular folders in Google Drive, you can’t add or remove people from subfolders of a Team Drive, though you can share individual pieces of content (not folders) with additional people.
- You can only move content you own to a Team Drive (may be an issue if you are organizing files on behalf of another person).

**Team Drive Tips**

- If you’re sharing with a large list of people such as your department, share your Team Drive with a Google Group instead of individually adding each member ([here’s how to request a Google Group](#)). When people join or leave the group, access to your
Team Drive will automatically change. If you prefer not to use Team Drive, you can still share to a Google Group in Google Drive.

- To avoid duplication, coordinate with others in your department, especially IT staff, before creating a department-wide Team Drive.
- Give folders a unique name including your department name. For example, use something specific like “Psychoceramics Faculty Meetings” or “NanoLab Machine Learning Project”, not anything too general like “Meeting Minutes” or “Team Files”.
- If you include any students in your sharing permissions, take note that when they graduate, their access will continue under their alumni account. We recommend annual review of the people included in your sharing permissions, to make sure you’re not oversharing sensitive data with people who are no longer contributing to your team.

If you use Team Drive, we want to know how it's working for you and if we should add any information or tips to this page. Let us know by leaving a comment below!
