

Use the Canvas Instructor Mobile App to Access Canvas Courses

maggie vecchione - 2023-07-05 - Comments (0) - Preparing for Semester Startup

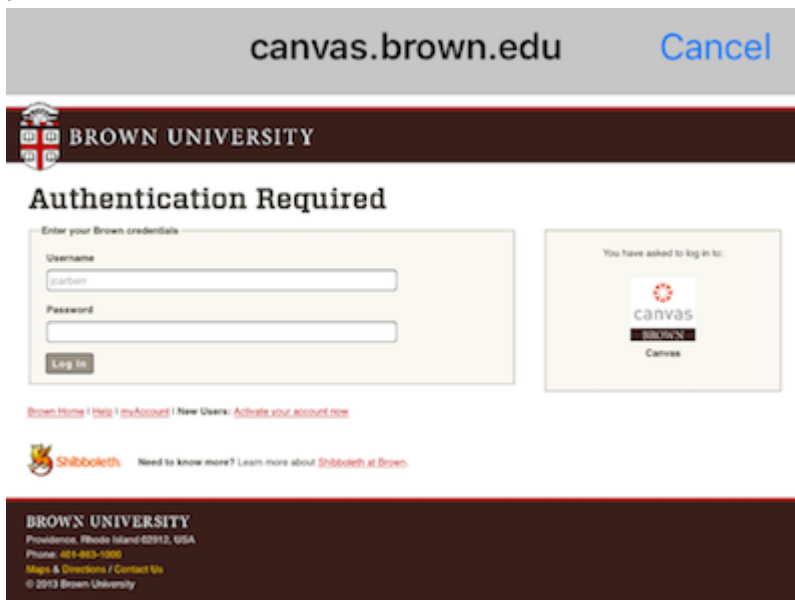

You can access your Canvas course content from an Android phone, iPhone, or iPad.

To access your Canvas courses:

1. Install the **Canvas Teacher** app from Google Play store for Android or iTunes store for iPhones.
2. Open the Canvas app.

3. When prompted for your school name enter **canvas.brown.edu**. The app will ask for Brown University authentication.
4. Log in with your **Brown username and password**. The app will request access to your account.

The screenshot shows the mobile interface for logging into Canvas. At the top, there is a grey bar with the text "canvas.brown.edu" and a blue "Cancel" button. Below this is a dark red header with the Brown University logo and the text "BROWN UNIVERSITY". The main content area is titled "Authentication Required" and contains two forms. The left form is for entering credentials, with fields for "Username" (containing "ucarbon") and "Password", and a "Log in" button. The right form is for granting access, with the text "You have asked to log in to:" and a "Canvas" button. At the bottom, there is a dark red footer with the Brown University logo, contact information, and a copyright notice: "© 2013 Brown University".

5. You will see a list of your Canvas courses.

To Do

Inbox

Your Canvas app allows you to:

- **Grade** - browse submissions and provide feedback to students with the mobile SpeedGrader
- **Communicate** - send announcements and messages
- **Make Updates** - change due dates, publish assignments and update course content
