

Using UDOIT for Canvas Accessibility

Kris Nolte - 2023-08-09 - Comments (0) - Accessibility

What is UDOIT?

UDOIT is a tool for improving web accessibility within Canvas. It allows faculty and other course designers to scan a course, generate a report, and learn how to address common accessibility issues.

Installing UDOIT

Please fill out this [UDOIT request form](#) so a learning technologist can install the latest version of this tool for you. Once installed, UDOIT will appear in your Canvas course navigation, though it will be hidden for students. This tool will only appear for those with the Teacher, TA, UTA, or Designer role in Canvas.

UDOIT Overview

Resources

[UDOIT Cloud 3.0 User Guide](#) - Guide including details about [what accessibility issues UDOIT looks for](#) and other [‘getting started’ resources](#) for UDOIT.

Note: The Digital Learning and Design (DLD) team is piloting the new version of this tool and welcomes any feedback. For more help with getting started, write to dld@brown.edu or sign up for a 1:1 [Canvas course accessibility consult](#) with a learning designers/technologist.
