Windows 11 at Brown

Christopher Grossi - 2024-06-26 - Comments (0) - Windows and PC Computers

Windows 11, originally released in October 2021, is Microsoft's latest major version of its Windows operating system. Windows 11 is compatible with Brown's core services and functional with our "core" software, supported browsers and VPN.

What's New?

The overall look of Windows 11 is different from Windows 10, but many features are quite similar since the two operating systems share the same base code. If you would like to learn more about these differences, please watch this [Quick Tips](#) video. For a deeper dive on Windows 11, please take advantage of the [Windows 11 Essential Training](#) course on LinkedIn Learning. Click [here](#) for further information on accessing LinkedIn Learning.

Important Dates

TBD - Windows 11 available to Brown-issued Windows computers

TBD - Windows 11 install deadline for Brown-issued Windows computers

October 14, 2025 - Windows 10 End of Support

Windows 10 Support?

Microsoft will no longer be providing security or feature updates to Windows 10 after October 14, 2025. If you're still running Windows 10 on a Brown device as of late 2025, please reach out to your department's computer support person for assistance.
